Bibliography

Index

(G, X)-structure, 25
A-polynomial, 148
\( \pi_1 \)-injective, 153
d\((v)\), 34
2-bridge knot or link, 123
6-theorem, 164
6-theorem, weaker, 163

abelian representation, 145
accidental surface, 178
affine algebraic set, 144
   morphism, 144
   reducible, irreducible, 145
affine torus, 27
affine transformation, 27
affine variety, 145
algebraic convergence, 86
alternating, 8
alternating knot or link, 171
ambient isotopic, 1
ambient isotopy, 151
analytic continuation, 31
anannular, 154
angle structure, 112
angled polyhedral structure, 159
arc length, 12
atoroidal, 154
augmented link, 96
   fully augmented, 96
augmenting link diagram, 96

bigon, 10
bilipschitz, 84
bilipschitz constant, 84
bilipschitz distance, 84
bilipschitz topology, 84
Borromean family, 94
Borromean rings, 94
Borromean twisted sisters, 94
boundary at infinity, 14
boundary bigon, 160
boundary compressible, 153
boundary compression disk, 153
boundary incompressible, 153
boundary irreducible, 154
boundary parallel, 153
canonical component, 146
canonical decomposition, 137
Cauchy sequence, 24
Chabauty topology, 86
character variety, 146
   canonical component, 146
chart, 25
circle at infinity, 14
circle packing, 98
   intersection graph, 98
circle packing theorem, 98
combinatorial area
   disk, 159
   surface, 159
complete, 24
complete hyperbolic surface, 34
complete structure, 39
completeness equations, 54
complex length, 79
complexity of essential surface, 157
compressible surface, 152
compressing disk, 152
cone angle, 78
cone manifold, 78
conjugate, 59
connect sum, 171
continued fraction, 121
convergence
   algebraic, 86
   geometric convergence of groups, 86
   in framed pointed bilipschitz
      topology, 85
   in pointed bilipschitz topology, 85
transverse intersection, 151
trichotomy of surfaces, 179
trivial Dehn filling, 81
tubular neighborhood, 151
twist knot, 89
twist region, 89
twist-number, 175
twist-reduced, 174
valence, 9
vertex triangle, 160
vertical fundamental domain, 137
virtual fiber, 178
volume form, 13
volume functional, 114
Wallace, fundamental Dehn filling theorem, 78
Weil rigidity theorem, 119
whitehead link, 89
wild knot, 1
Wirtinger presentation, 139
Zariski topology, 144
