# Publications

The side figure shows a summary, as a function of the year, of my 51 fully refereed publications in major international peer-reviewed multidisciplinary scientific journals (Science, impact factor IF=31) and in the leading international peer-reviewed journals in the different fields of research related to my work: Astrophysical Journal and Astrophysical Journal Letters (IF = 6.7, the 3rd top publication in Physics & Mathematics according to 2014 Google Scholar Metrics), Astronomy & Astrophysics (IF = 5.1), Monthly Notices of the Royal Astronomical Society (IF = 5.4), Meteoritics and Planetary Science (IF = 2.8), Geochimica Cosmochimica Acta (IF = 4.4), Physical Review Letters (IF = 7.4, the 1st top publication in Physics & Mathematics according to 2014 Google Scholar Metrics), and Physical Review C (IF = 3.7). The lowest points in my academic productivity in terms of number of papers are related to the career breaks due to the birth and caring of my four children. Overall, I have published more than 150 works (including conference proceedings and abstracts) and have a total of more than 2800 citations to my work with an h-index of 26 (as of November 2014, according to NASA ADS).
